

Student Health and Wellness Center

2005-2006 Executive Summary

The Student Health and Wellness Center (SHWC) is committed to student learning and the development of citizen leaders as well as to the Student Development Goals set forth by Longwood University. Review of major program goals, documentation of success with students, and additional learning opportunities are tracked and posted on our website at www.longwood.edu/health:

- (1) [2005-2006 SHWC Objectives and Primary Tasks](#)
- (2) [Retention Plan Commitment](#)
- (3) [2005-2006 Wellness Team Goals](#)
- (4) [2005-2006 Learning Plan Report](#)
- (5) [Participation Numbers](#) summary for wellness programs and services
- (6) Review of the [Council on the Advancement of Standards \(CAS\) summary for College Health Programs \(CHP\)](#). The mission, purpose, and philosophy of the CHP were consistent with Longwood University's mission and vision.
- (7) [Virginia Department of Health Tobacco Grant](#) funding will continue to address Longwood University's smoking policies.

This year the emerging issue of Pandemic Flu Preparedness has necessitated the creation of a new website, in partnership with our Public Relations department, to expedite communication. The documentation of all current information and resources is now available. Education of students, faculty, staff, and the larger community related to Pandemic Flu Preparedness began with the summer orientation programs and will continue throughout the 2006-2007 year. Pandemic Flu Preparation is being conducted within the context of the University Emergency Operations Plan.

The Student Health and Wellness Center is actively involved in the transition to Longwood University's new Health and Fitness Center. Planning and collaboration for relocation to the new facility will be a priority during the 2006-2007 year.

The Wellness Coordinator will be involved in conducting a Council on the Advancement of Standards (CAS) Assessment of Longwood University's Gay, Lesbian, Bisexual, and Transgender programs.

In accordance with recommendations from Institutional Assessment, we will conduct the National College Health Assessment (NCHA) during the 2006-2007 year.
