

## **Stick It Where The Sun Don't Shine**

### **Description:**

Residents will come together to hand gout and make suncatchers for their rooms. This program will provide a relaxing and creative experience and will educate residents about positive factors of the sun.

### **Need:**

- Supplies to make sun catchers
- Information on the positive factors of the sun (\*\*The R.A. that hosted this program noted that looking back, it might have been better to have the info on flyers in the area where the program was being held, as people have a tendency to come in and out )
