

GPA Calculation

Example:

In order to figure your semester GPA, you have to calculate the weight of each grade by multiplying the credit hours by the quality points (chart below). Here is an example:

Course	Credit Hours		Grade	Quality Points	Total Points
Math 114	3	X	F	0	0
English 150	3	X	B-	2.7	8.1
Biology 101	4	X	C-	1.7	6.8
Art 160	3	X	B+	3.3	9.9
Phys. Ed. 101	2	X	A	4.0	8
Total Hours	15				32.8

Total of Quality Points 32.8 divided by Total Credit Hours 15 = GPA 2.18

Now it's your turn (if you don't need all the spaces it's okay, I made extra for lots of classes):

Course	Credit Hours		Grade	Quality Points	Total Points
		X			
		X			
		X			
		X			
		X			
		X			
		X			
		X			
Total Hours					

Total of Quality Points _____ divided by Total Credit Hours _____ = GPA _____

Grade	Quality Points
A	4.0
A-	3.7
B+	3.3
B	3.0
B-	2.7
C+	2.3
C	2.0
C-	1.7
D+	1.3
D	1.0
D-	0.7
F	0.0

GPA Calculation/Midterm Reflection

1. Now you have seen your Midterm Grades and calculated your possible Semester GPA, what are your thoughts?
2. We are half way through your first semester, what worries or concerns do you still have (list them in order of concern?)
3. What are you proud of?
4. What could still use some work?
5. What additional help or resources do you need that you aren't receiving?
